Jan. 30 Silvopasture: An Introduction and Overview

We will introduce silvopasture for any level, including who should do it, and the advantages and disadvantages of the system. In addition, listen to a producer's on-the-ground experiences.

Feb. 6 Establishing Pine Silvopasture: from Pastures to Plantations

Presenters will discuss approaches for creating a pine silvopasture system from existing woodlands or forest as well as pastures ranging from small to large acreages. In addition, listen to a producer's on-the-ground experiences.

Feb. 13 Establishing Hardwood Silvopasture: from Pastures to Plantations

Presenters will discuss to establish a hardwood silvopasture system on an existing field or pasture or from existing woodlands or forests. In addition, listen to a producer using silvopasture discuss their experiences on the ground.

Feb. 20 From Forage to Livestock: Managing Animals in a Silvopasture system

Presenters will discuss different aspects of managing animals in a silvopasture system from determining which animals, how much land they need, to introducing them to the silvopasture.

Feb. 27 Moving Towards a Silvopasture System: Getting Started & Finding Help

Learn about the various programs and organizations available to assist with expertise and funds. From cost-share to grants to site visits and more. In addition, listen to a producer's on-the-ground experiences.

Mar. 5 Silvopasture producers share their stories and Answer Questions: A Panel Discussion

Learn from the experiences of silvopasture producers in this panel discussion. Each producer in this series will have presented their story in an earlier webinar. Here, in a question-and-answer format, participants can follow up with their questions.

This webinar series is part of the Woodland Stewards regional extension program for landowners. Created by a team of forestry Extension professionals from multiple states. This is the sixth season of the Woodland Stewards series.
